EDUCATION

University of Maryland, College Park

GPA: 3.77

Bachelor of Science in Computer Science and Business

Expected May 2027

Relevant Coursework: Introduction to Computer Vision, Introduction to Data Science, Organization of Programming Languages, Algorithms, Object-Oriented Programming II, Linux Environment and C Programming, Discrete Structures, Linear Algebra

EXPERIENCE

Junior System Administrator

May 2024 – Present

University of Maryland CS Department

College Park, MD

- Deliver network and system administration, helpdesk support, and maintain hardware, software, and information systems for 80+ faculty and 1200+ computer network
- Administer and maintain RHEL (Red Hat Enterprise Linux) on faculty workstations and datacenter servers, ensuring system stability, security, and efficient provisioning
- Manage website redirection, user accounts, and access control for faculty and instructors, streamlining system administration and resource allocation

Operation Intern

May 2024 – Aug. 2024

Chosan

Rockville, MD

- Collaborated with Yardi's UX/UI designer to develop a streamlined rental property website, enhancing property showcase, strengthening brand value, and improving customer experience
- Directed 3 build-out projects during internship, resulting in an annual revenue increase of \$72,000
- Communicated directly with 16 clients and 12 internal team members to define project scope and requirements for rental properties, ensuring effective agenda-setting and project alignment

Programming Teacher

March 2022 – July 2023

Panda Programmer

Gaithersburg, MD

- Delivered engaging and tailored programming instruction to over 100 elementary school students, covering Scratch, web development (HTML/CSS/JavaScript), robotics, and Python, adapting curricula to individual learning styles and interests
- Developed and implemented differentiated lesson plans to accommodate diverse skill levels and learning paces, fostering a supportive and inclusive learning environment
- Effectively managed and tracked student progress, providing constructive feedback and individualized support to ensure successful learning outcomes

PROJECTS

Good Morning Smart Mirror | *Raspberry Pi, Magic Mirror, Arduino IDE*

- Engineered a custom smart mirror utilizing Raspberry Pi and Magic Mirror software to deliver a personalized daily information hub
- Implemented modular Magic Mirror configurations to display real-time data, including weather forecasts, calendar events, news feeds, and personalized greetings.
- Developed a user-friendly interface that enhanced daily routines by providing quick access to essential information.

My Pokédex | *React, TypeScript, Axios, Bootstrap, Git*

- Developed a dynamic, multipage Pokédex web application using React, TypeScript, and the PokéAPI to provide comprehensive Pokémon data.
- Implemented asynchronous data fetching with Axios to retrieve and display Pokémon information efficiently, enhancing user experience.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, Rust, OCaml, HTML, CSS, JavaScript, TypeScript, SQL, ARM Assembly, MATLAB, Ruby

Languages: Mandarin (Fluent), Cantonese (Conversant)
